CONTROL PANEL CONNECTION

for KBH

1.

1. Unscrew the two holes on the front of the control panel.

2. Determine which perforated hole to remove for the 9-pin connection to go through. Others can be used for mounting holes.

2.

3. Connect the 9-pin connection from the range hood to the control panel.

3.

4. Mount the box inside the wall or cabinetry by cutting a hole and securing the screws. Every installation will be unique to the house and the mounting preference.

5. Screw the two holes on the front of the control panel.

4.

5.
